

## Getting Back In Top Form

Whether old or very active, the goal of animal rehabilitation is to improve your pet's quality of life by enhancing their recovery from orthopedic and neurological conditions, reducing and managing chronic pain, and promoting health and wellness.

## Is Animal Rehabilitation right for your pet?

Similar to the benefits humans get from physiotherapy, animal rehabilitation can benefit pets in many different life stages and situations. Under the caring leadership of Glenn Pepito, BScPT we offer a full range of animal rehabilitation services.

### Examples of pets who would benefit from animal rehabilitation:

-  Post surgical patients
-  Sporting dogs
-  Agility dogs
-  Senior pets
-  Overweight pets
-  Neurological patients

## Treatments

### CONDITIONING & STRENGTH TRAINING

Peak performance & health for athletic, agility and show dogs.

### THERAPEUTIC EXERCISES

Build muscle strength and increase the range of motion in order to return to normal or to aid orthopedic/neurological conditions.

### LASER THERAPY

This non-invasive therapy offers pain relief and faster healing.

### WARM/COLD THERMOTHERAPY

Designed to encourage affected limb use for those patients reluctant to use a limb after surgery.

### ELECTROTHERAPEUTIC TREATMENT

Electrical currents to accelerate healing, slow muscle atrophy and build muscle mass during periods of inactivity
